

Uniloy to Display Continued Investments at NPE 2024 The Plastics Show

Tecumseh, MI – (April 29, 2024) – Uniloy, Inc., a global leader in blow molding machines and mold technology, will be highlighting its continued investments in the company, its products and aftermarket services at NPE 2024 The Plastics Show on May 6-10 in Orlando, Florida. Attendees can visit booth #S15057 to speak with the Uniloy team about these latest advancements in the company.

As part of its commitment to providing timely and professional service and support, the company recently increased investment in its Uniloy Genuine Parts business by the millions, expanding its capability to produce genuine replacements for machine components. To help customers get the most out of their blow molding machines, Uniloy has expanded its Certified Field Service Technician Program. With this global network of expertly trained technicians, the company has increased customer response time and improved overall satisfaction.

Uniloy also invested in the Mold Maintenance R&R (Repair and Refurbish) Program to maximize customers' uptime, provide predictable maintenance costs and deliver consistently higher-quality results. Talk with one of our Uniloy experts about how we can support your mold assets.

As customers move toward more sustainable operations, Uniloy has invested in machines and technologies that help them reduce their environmental footprint. The company developed an all-electric injection blow molding machine that saves energy and eliminates the use of oil. Uniloy has also developed Coex 3-layer head technology to help customers meet governmental regulations and operate in a more sustainable way.

"We look forward to attending this year's NPE show and sharing all the latest investments we've made in our company that will directly benefit customers," stated Gary W. Riley, Sr., CEO of Uniloy. "Our goal is to provide the latest machines, technologies, Genuine Parts, and aftersales services and support to help our customers drive results in their businesses."

Discover more about these and other investments Uniloy has made, and continues to make, at the NPE 2024 The Plastics Show, booth #S15057, and at <https://www.uniloy.com/>.

About Uniloy

Founded in the 1950s, Uniloy is a global leader and manufacturer of blow molding machines and technologies, as well as blow molds and associated tooling. The company manufactures shuttle, industrial, injection blow, and reciprocating blow molding machines; they also provide comprehensive service, rebuilds, retrofits, parts, and training capabilities. Uniloy is headquartered in Tecumseh, Michigan. ###
