

Uniloy Enhances Genuine Parts E-Store with Expanded Inventory and Guest Login Access

Tecumseh, MI – Uniloy, Inc., a global leader in blow molding technology, is proud to announce new improvements to its Genuine Parts E-Store, providing customers with expanded access to critical parts and a simplified path to purchasing.

The Uniloy Genuine Parts E-Store, designed to help customers minimize downtime with fast and reliable access to OEM parts, now includes several major enhancements:

- **Expanded Parts Inventory** – New parts are now available, including components for Uniloy's latest shuttle machines.
- **Guest Login Access** – New customers can now log in as guests to view part pricing and inventory. From there, they can easily submit a request to transition to a full customer account with complete purchasing capabilities.
- **Keyword Search Functionality** – Customers can quickly find what they need with product keyword lookups.
- **Automatic Cross-Referencing of Legacy Part Numbers** – Old part numbers are automatically matched to their current equivalents for easier ordering.
- **Same-Day Shipping** – Genuine Uniloy Parts are ready to ship the same day, to help customers maximize uptime.

"These enhancements reflect our ongoing commitment to improving the customer experience," said Todd Renner, Uniloy Vice President, Aftersales. "By expanding our inventory and introducing features like guest login and automatic part cross-referencing, we're making it faster and easier for our customers to access the Genuine Uniloy Parts they depend on."

The Genuine Uniloy Parts E-Store also provides comprehensive kits, assembly diagrams, and detailed product information, ensuring customers can identify and order the right parts every time.

To explore the expanded features and inventory, visit the Genuine Uniloy Parts E-Store at store.uniloy.com.

About Uniloy

Founded in the 1950s, Uniloy is a global leader, providing blow mold solutions, machines, and technologies, as well as blow molds and associated tooling. The company manufactures shuttle, industrial, injection blow, and reciprocating blow molding machines; they also provide comprehensive service, rebuilds, retrofits, parts, and training capabilities. Uniloy is headquartered in Tecumseh, Michigan.
